

**AMENDMENT TO THE CLAIMS**

**Listing of Claims:**

**Claim 1 (Currently Amended):** A mobile telephone, comprising:

a display which displays information including telephone numbers or characters;

a first ~~data~~ bus for connecting to controller ~~control means~~ and memory storage means that are provided as principal integrated circuits; and

a second bus for connecting said controller ~~control means~~ and said display means;

wherein said first bus and said second bus are independently connected to said controller ~~control means~~,

wherein said first bus is not connected to said display means, and said second bus is not connected to said memory storage means; and

wherein said controller ~~control means~~ controls said first ~~address-data~~ bus and said second bus independently.

**Claim 2 (Currently Amended):** A mobile telephone as claimed in claim 1, further comprising communication means for transmitting and receiving signals via a radio line,

wherein said controller ~~control means~~ is controlled to prohibit access to said second ~~address-data~~ bus while said communication means is receiving signals.

**Claim 3 (Currently Amended):** A mobile telephone as claimed in claim 1, wherein said second bus is driven by lower voltage than said first ~~address-data~~ bus.

**Claim 4 (Cancelled):**

**Claim 5 (Currently Amended):** A mobile telephone as claimed in claim 1, wherein said display means is arranged near an antenna of the mobile telephone.

**Claim 6 (Cancelled):**

**Claim 7 (Currently Amended):** A mobile telephone, comprising:

a display which displays information including telephone numbers or characters;

a first bus for connecting to controller ~~control means~~ and memory ~~storage means~~  
that are provided as principal integrated circuits;

a second bus for connecting said controller ~~control means~~ and said display ~~means~~;

wherein said first bus and said second bus are independently connected to said  
controller ~~control means~~,

wherein the first bus is not connected to said display ~~means~~, and said second bus  
is not connected to said memory ~~storage means~~.

**Claim 8 (Currently Amended):** A mobile telephone as claimed in claim 7,  
wherein said controller ~~control means~~ controls said first bus and said second bus independently.

**Claim 9 (Currently Amended):** A mobile telephone as claimed in claim 7,  
further comprising communication means for transmitting and receiving signals via a radio line,  
wherein said controller ~~control means~~ is controlled to prohibit access to said  
second bus while said communication means is receiving signals.

**Claim 10 (Previously Presented):** A mobile telephone as claimed in claim 7,  
wherein said second bus is driven by lower voltage than said first bus.

**Claim 11 (Currently Amended):** A mobile telephone as claimed in claim 7,  
wherein said display ~~means~~ is arranged near an antenna of the mobile telephone.
